## PROFESSIONAL SUMMARY

---

Frontend-focused engineer with a strong eye for UI design, currently pursuing B.E. in Computer Science at SDMIT Ujire. I build production-grade, fully responsive interfaces using React.js, TypeScript, Next.js, and Tailwind CSS, translating design intent into pixel-accurate, accessible experiences. Familiar with Figma for design-to-code workflows. I have shipped multiple live products end-to-end with attention to visual hierarchy, interaction design, and design system consistency. Looking to contribute as a UX/UI Design Intern where I can bridge design thinking and frontend engineering.

## DESIGN AND TECHNICAL SKILLS

---

**UI Design and Prototyping:** Figma (design-to-code), Wireframing, Responsive Design, Design Systems, Visual Hierarchy

**Frontend Engineering:** React.js, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Framer Motion, ShadCN UI

**Interaction and Animation:** Framer Motion, CSS transitions, component micro-interactions, dark/light theme systems

**User Research and Testing:** Usability feedback analysis, iterative design, user flow design, accessibility considerations

**Backend and Data:** Node.js, PostgreSQL, Supabase, REST APIs, Python

**Collaboration Tools:** Figma, Git, GitHub, Postman, VS Code, Vercel

## PROJECTS

---

### The Swift Dictionary - Interactive Vocabulary Platform

*Next.js 15, TypeScript, Tailwind CSS, Framer Motion, Supabase, PostgreSQL*

- Designed and built a visually rich, content-heavy platform from scratch with era-specific color palettes for all 12 Taylor Swift albums, demonstrating strong visual identity and brand alignment thinking.
- Crafted multiple distinct UI surfaces: a Dictionary with search and difficulty filters, an Explorer with album-to-lyric drill-down, an Era Timeline, a Word of the Day widget, and a Favorites collection, each requiring independent user flow design.
- Shipped to a custom domain (the-swift-dictionary.me) with a Python data pipeline powering the content backend.

### Inkwell - Full-Stack CMS and Blogging Platform

*Next.js App Router, TypeScript, tRPC, Drizzle ORM, Supabase, ShadCN UI*

- Designed a CMS workflow interface enabling creators to publish content 50% faster, with focus on intuitive navigation, clear information architecture, and reusable component patterns.
- Built a fully responsive UI using ShadCN and Tailwind CSS with consistent design language across all views, reducing layout development time by approximately 35%.
- Implemented role-based access control flows, designing the permission hierarchy from a user experience perspective to ensure clarity for different user types.

### Caliber - AI Agent Evaluation Platform

*Next.js, TypeScript, PostgreSQL, Supabase*

- Designed a modular dashboard UI with reusable components for benchmarking AI agents, increasing development speed for new features by 40%.
- Focused on data-dense interface design, making complex evaluation metrics readable and actionable for end users.
- Built responsive layouts that maintained usability across device sizes for a technical, data-heavy product.

## The XO Store - E-Commerce Platform

*React.js, Node.js, Express.js, MongoDB, Stripe, Auth0*

- Designed and built the complete shopping UI including product catalogue, cart, and checkout flow with a focus on reducing friction at each conversion step.
- Implemented Auth0 authentication reducing login flow time by 25%, improving the user onboarding experience measurably.
- Applied Cloudinary image optimization improving product image load speed by approximately 45%, directly impacting perceived UI performance.

## WORK EXPERIENCE

---

### Frontend Web Development Intern | CODTECH IT Solutions Pvt. Ltd.

*Mar 2025 - Apr 2025*

- Built responsive, dynamic web interfaces using React.js and Tailwind CSS within a collaborative team codebase, following component-driven architecture and design system principles.
- Participated in design reviews and iterative feedback cycles within an Agile team, translating requirements into polished UI implementations.
- Maintained reusable component libraries ensuring visual consistency across the product.

## EDUCATION

---

### B.E. in Computer Science Engineering

*Dec 2022 - Jan 2026*

SDM Institute of Technology, Ujire, Karnataka

### 12th / PUC – Science

*Jul 2020 - Apr 2022*

Poorna PU College, Dharwad, Karnataka

## CERTIFICATIONS

---

- Full Stack Development Using React JS - CodeLab Systems
- The Complete Web Development Training Course - Infosys Springboard
- Data Structures and Algorithms using Java - Infosys Springboard
- Database and SQL - Infosys Springboard
